Item totals are cumulative at capture unless their metric basis states otherwise. Unique reach, viewers and accounts engaged are shown per item and are not added as unique people. Content-attributed follows are not net follower growth.

Collective figures sum mixed native definitions, as explicitly enabled for this report. See individual promotion and definition notes.

1 unavailable fields are retained as dashes. Numeric sums cover observed values only.

04 / REPORTING BASIS

Scope and metric notes

Source: @sample_account

Template preview

All sample images, account details and figures are fictional demonstration material.

Publication window

01 Jan 2026 - 31 Jan 2026, inclusive. 2 reels, 1 carousels, 1 posts, 4 stories.

Capture date

05 Feb 2026. Cumulative item metrics can include activity after the publication window. Exact account-period totals are included only when their dates were independently verified.

Ordering and visuals

The catalogue interleaves formats by publication date. Within-day cross-format order is unspecified where story timestamps are unavailable. Carousel slides retain their sequence. Video is represented by covers or previews with source links.

Collective figures

Sums cover observed, compatible native values. Reach, viewers and accounts engaged are not added into unique people. Content-attributed follows are not net follower growth.

Unavailable fields

A dash means unavailable. Zero is used only when observed or explicitly justified in the item notes.

Reporting note

This is a neutral reusable design preview. All sample account details, visuals and metrics are fictional.
